

Migration, modernization and deployment enhanced with data management and AI on Microsoft Azure

Customer challenge

Most businesses have moved the simple workloads to cloud. Now it's time to modernize and migrate the complex mission critical workloads, enhancing them with intelligent data and AI to truly achieve digital transformation.

Making this move is not easy however, as most customers need help due to lack of in-house skills and experience. Reducing risk in terms of potential downtime, performance issues, or decreased end-user productivity is essential.

Kyndryl® and Microsoft™ have teamed together to help customers address these challenges with a migration, modernization and deployment solution enhanced with data management and AI on Azure.

Solution features

- 1 Proven tools and processes for successful migrations
- 2 Data fabric reference architecture for enterprise-wide access to data
- 3 Intelligent workflows using open and secure design methodologies

How we help

Tools and processes

Discovery activities are executed for customer's on-premises infrastructure including workload assessment and Azure Service Map.

Third-party discovery tools for full understanding of application dependency mapping.

Monitoring determines application and network behavior and performance prior to executing a migration.

People and processes

Global team of Azure certified experts establish which workloads are best matched to Azure capabilities.

Workload placement plan, customer pre-requisites, and necessary tasks are reviewed with the customer.

Pre-migration performance assessment of the infrastructure, applications, and network helps identify any issues, such as software coding.

Expertise

Kyndryl and Microsoft share decades of experience working with customers to deliver enterprise-grade workload analysis, migration, implementation, and managed services for the most complex workloads.

Our partnership has a rich history of delivering customers-centric innovation, aimed at evolving and sustaining the world's most vital IT systems.

Kyndryl and Microsoft have the people, processes, and technology to help organizations progress their digital transformation journey using intelligent data and AI-driven insight.

Why Kyndryl?

Kyndryl works at the core of businesses that move the world. With more than 90,000 skilled professionals operating in over 100 countries, we design, build, manage and modernize the mission-critical technology systems that the world depends on every day. Working with Microsoft Azure and our customers, we co-create solutions to help enterprises reach their peak digital performance.

To learn more about how Kyndryl can help you migrate, modernize and deploy on Microsoft Azure, contact your Kyndryl representative or visit us at kyndryl.com.
