3 benefits of migrating your SAP applications to AWS with help from Kyndryl Managed Services

Migrating SAP applications from an on-premises environment to the cloud of your choice can help you simplify your operations.

But many organizations lack the in-house skills to migrate or run enterprise resource planning (ERP) applications on cloud. By engaging Kyndryl™ to move and manage your SAP applications on Amazon Web Services (AWS), you can quickly bridge skill gaps, free your teams to focus on more strategic tasks and harness new found business agility with a managed cloud.

We'll help you achieve these 3 benefits for your SAP applications on AWS:

1 Eliminate the skills gap and enable teams to focus on innovation, not application management and maintenance.

2 Simplify SAP operations for applications running on AWS while improving security and application resiliency.

3 Provide streamlined management of SAP applications, like S/4HANA, in addition to non-SAP applications.

How we help

Eliminate the skills gap and enable teams to focus on innovation, not application management and maintenance.

Experience end-to-end SAP builds on AWS that can go beyond standard automation using Kyndryl's managed apps platform running on AWS.

Free your teams to use the power of data and deepen customer relationships with streamlined application management and maintenance.

Leave resolving issues to us, as well as infrastructure provisioning, application installations, database management and performance monitoring.

Provide streamlined management of SAP applications, like S/4HANA, in addition to non-SAP applications.

Include all applications that interact with SAP in the migration process from planning to testing and management.

Increase visibility with a managed services portal that shows SAP applications and the AWS infrastructure from a single pane of glass.

Benefit from deep expertise, learning and enhanced tools from thousands of SAP application migrations and integrations with non-SAP applications.

Simplify SAP operations for applications running on AWS while improving security and application resiliency.

Take advantage of 24×7 service desk access with a single point of contact that can streamline problem identification and resolution.

Get security and resiliency backed by application-level service-level agreements based on the unique needs of the workloads across your environment.

Gain a clear understanding of roles and responsibilities throughout your entire stack to help enable digital initiatives and remove barriers that weaken security.

Why Kyndryl?

Kyndryl has deep expertise in designing, running and managing the most modern, efficient and reliable technology infrastructure that the world depends on every day. We are deeply committed to advancing the critical infrastructure that powers human progress. We're building on our foundation of excellence by creating systems in new ways: bringing in the right partners, investing in our business, and working side-by-side with our customers to unlock potential.
