Kyndryl Security Operations and Response Services

Highlights

– Around-the-clock threat detection and rapid response capability

– Advanced threat discovery and response to detected security incidents

– Incident triage and response with threat intelligence forensics

Security operations teams are facing more pressure than ever, from sophisticated threat actors using increasingly disruptive attack techniques to rapidly expanding attack surfaces in the wake of pandemic-driven digital transformation. By 2025, Gartner[1] predicts that 70% of CEOs will mandate a culture of resilience to survive coinciding threats including cybercrime from COVID-19, cybercrime, severe weather events, civil unrest, and political instabilities.

Kyndryl can help. Powered by next-generation technologies and analytics, Kyndryl™ Security Operations and Response Services are designed to help your business to confidently detect, triage, investigate, and respond to advanced security threats. Our end-to-end threat management solution integrates offensive testing, managed security services, artificial intelligence, and incident response for a comprehensive approach to threat management.

Around-the-clock threat detection and rapid response capability

We'll help you discover and respond to detected security incidents. Our 24×7 threat detection and fast response capabilities are fueled by threat intelligence and proactive threat hunting to catch incidents as soon as—or even before—they arise.
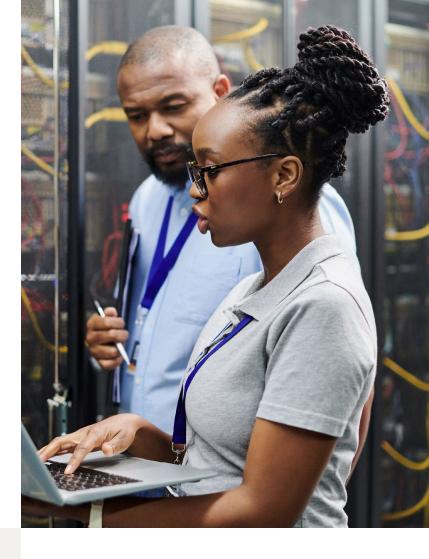

- Establish and strength linkage between security and resiliency

- Identify, detect, and respond consistently to threats

- Improve transparency and visibility into real-time ticket details

Advanced threat discovery and response to detected security incidents

We'll help you mitigate the impact of disruption with capabilities to automatically recover critical business processes and data. Our end-to-end framework empowers IT teams to anticipate, protect against, withstand, and recover from adverse conditions impacting cyber-enabled services.

- Identify necessary actions to protect the environment with in-depth monitoring

- Get end-to-end threat management for unmanaged devices across industries

- Integrate offensive testing, managed security services, artificial intelligence, and incident response capabilities

Incident triage and response with threat intelligence forensics

We'll help you respond to detected security incidents, with incident triage, incident response, threat intelligence curation and management, and compliance. While we help you detect and respond to security incidents, we'll also help you curate threat intelligence and improve visibility into ticket details to further strengthen security and weave cyber resilience into the organizational fabric of your business.

- Support emergency incident response with preventative actions

- Significantly reduce response times to mitigate the impact of a security incident

- Streamline security and resiliency approach while leveraging the expertise of strategic partners

Why Kyndryl?

Kyndryl has deep expertise in designing, running, and managing the most modern, efficient, and reliable technology infrastructure that the world depends on every day. We are deeply committed to advancing the critical infrastructure that powers human progress. We're building on our foundation of excellence by creating systems in new ways: bringing in the right partners, investing in our business, and working side by side with our customers to unlock potential. With more than 7500 skilled security and resiliency practitioners worldwide, we have decades of experience working with customers to protect against, respond to, and recover from some of the world's most challenging cyberattacks and disasters.
